

MUFG to Establish Innovation Center in Osaka

Tokyo, September 3, 2020 --- MUFG and MUFG Bank today announced the establishment of a membership-based innovation center (“the facility”) with the aim of contributing to the revitalization of the economies of Osaka and the Kansai region by solving tourism industry issues through accelerating innovation.

1. Overview of the facility

Objective	Membership-based innovation center for tourism industry
Planned Location	3-6-3 Fushimimachi, Chuo-ku, Osaka-shi, Osaka, Japan (1F-2F, Osaka Building, Mitsubishi UFJ Trust and Banking Corporation)
Facility area	About 1,000 m ²
Opening date (tentative)	Around February 2021
Operator	A foundation (name to be determined) established and operated by MUFG and MUFG Bank

2. Background and objective

In recent years, as society and the economy undergo significant transformation, efforts to make innovations in industry, government, and academic fields have been intensifying. MUFG has been working to support the growth of new industries in order to contribute to the growth of startups. As an extension of those activities, MUFG has decided to establish the facility and contribute to solving social issues by utilizing the facility as a foundation for the innovation-based development of industries and new technologies.

In its national strategy, the Japanese government positions the tourism industry, the focus of the facility, as one industry key to the revitalization of regional economies. However, since this is an industry with a wide range of companies involved, digitization or transformation of business models will not be easy. There are multiple issues that must be solved within the industry. Furthermore, it has been severely damaged by the spread of COVID-19, making efforts for early recovery essential.

The facility is located in Osaka, one of the most popular sites for Japanese and foreign tourists, and where the Japan Expo is scheduled to be held in 2025. The facility will be designed to contribute to accelerating innovation in tourism and revitalizing the economies of Osaka and the Kansai region by working with members to create new businesses and services. This will be accomplished by providing a place for co-creation

between startups, large companies, government/DMO^[1]s, and academia^[2] who share a common ambition to solve underlying issues within the tourism industry.

[1] DMO: Destination Management/Marketing Organization

[2] Academia: Universities and other educational, research institutions and academic organizations

- End -
